Skills

- .NET | React | Database Design | TDD | CI/CD | AWS(S3,EC2,Lambda,CloudFormation,etc.)|gRPC | Git | Azure
- Microservices | Distributed Systems | Full Stack Development | Mentoring | Micro Frontends | Agile | Scrum
- C# | TypeScript | JavaScript | CSS | Tailwind CSS | MS SQL Server | PostgreSQL | NoSQL | Unit Testing | Integration Testing
- GitHub Actions | Octopus Deploy | TeamCity | SonarQube | Azure DevOps pipelines

Experience

- | | | | |
|--|---------------------------|-------------------|--------------------------|
| Senior Software Engineer | <u>Carmax</u> | <i>Remote</i> | 06/2025 - now |
| <ul style="list-style-type: none">• Modernized the customer identity platform powering CarMax's digital ecosystem, enhancing authentication and personalization experiences that increased new user acquisition and significantly improved revenue performance• Migrated legacy system components to modern technologies, ensuring compliance with enterprise software and design standards.• Built end-to-end CI/CD and Infrastructure as Code pipelines using Azure DevOps, Bicep, and PowerShell, enabling fully automated, repeatable Azure deployments.• Contributed to initiatives that reduced authentication-related operational costs by over \$250K annually. | | | |
| Senior Software Engineer | <u>ArgusMedia</u> | <i>Remote</i> | 03/2022 - 02/2025 |
| <ul style="list-style-type: none">• Built and integrated applications to automate pipelines, manage users, and email campaigns, driving a 15% increase in revenue.• Contributed to the move towards a serverless architecture using AWS Lambda Functions, reducing costs by over 6 times compared to the previous infrastructure and improving overall efficiency for both APIs and UI empowered applications.• Drove infrastructure enhancements. Implemented disaster recovery and changed CI/CD processes, improving code quality, security, and environment visibility for multiple components and applications. Mentored newcomers to maximize profit from new people.• Integrated Microsoft EntraID/Azure B2C to improve the security and reliability of key applications within the company. | | | |
| Senior Software Engineer | <u>Namecheap</u> | <i>Remote</i> | 03/2021 - 12/2021 |
| <ul style="list-style-type: none">• Developed frontend using micro-frontend architecture. Covered multifunctional Fullstack role, enhancing UI, Database, and CI/CD.• Contributed to the design and development of a brand new Spaceship project related to the domain name lifecycle.• Maintained and added new features to a platform for domain operations, replacing a legacy system.• Extended backend features using the latest .NET technologies, improved UI with React, and ensured software reliability through tests. | | | |
| Software Engineer | <u>Amido</u> | <i>Remote</i> | 11/2019 - 04/2021 |
| <ul style="list-style-type: none">• Developed a locking system platform using gRPC to achieve high-speed service communications across a distributed system.• Created a health check dashboard for microservices using the latest .NET Core and React versions, enhancing platform stability.• Integrated services with emergency support, demonstrating real-world impact. | | | |
| Software Engineer | <u>DataArt</u> | <i>Dnipro, UA</i> | 04/2018 - 08/2018 |
| <ul style="list-style-type: none">• Expanded my expertise by working on healthcare software projects, improving my understanding of the technical and regulatory aspects of the medical field. Worked on API development and made infrastructure changes to improve performance and scalability. | | | |
| Software Engineer | <u>LeadsMarket</u> | <i>Dnipro, UA</i> | 04/2016 - 11/2019 |
| <ul style="list-style-type: none">• Developed a platform with flexible logic for business users, improving response times.• Designed and implemented Azure cloud infrastructure. Provisioned and managed Azure Key Vault, Service Bus, Azure SQL Database, and App Services, integrating secure secret management. Built end-to-end Azure DevOps YAML pipelines to automate deployments.• Implemented a new module for client payment calculation, improving speed by 30%. | | | |
| Software Engineer | <u>Softserve</u> | <i>Dnipro, UA</i> | 11/2013 - 04/2016 |
| <ul style="list-style-type: none">• Built a strong foundation in healthcare software development, applying industry-specific knowledge to deliver effective and compliant solutions. Supported and developed new features for an existing platform, implemented proof of concepts, wrote documentation | | | |

Education

- | | | | |
|--|---|-----------------------|-----------------------|
| Specialist | <u>Dnipropetrovs'k National University</u> | <i>Dnipro, UA</i> | Graduated 2015 |
| <ul style="list-style-type: none">• Department of Applied Mathematics, Software Systems | | | |
| Bachelor | <u>KrivyiRih National University</u> | <i>Krivyi Rih, UA</i> | Graduated 2013 |
| <ul style="list-style-type: none">• Department of Information Technology, Software Systems | | | |
